2 Areas	£160
3 Areas	£200

Bunny Lines	£40
Gummy Smile	£40
Hyperhidrosis	£360

Skin Treatments

Dermaplaning is a simple and safe manual exfoliation technique used to remove dead skin cells, vellus hair (peach fuzz) and surface debris from the epidermis to achieve a smooth and glowing complexion. It is also recommended for those with dry or rough skin texture, to minimize superficial acne scarring, minor scars, uneven skin tone, large pores, fine lines and excess facial hair.

Dermaplane Facial	£30
Oilaplane Facial	£35
Dermaplane Oilaplane Facial + LED Illumination Therapy	£50
Hydrafacial	£50
Derma Glow (Dermaplane & Microneedling)	£65

(Price on Consultation)

LED Illumination Therapy

1 Session	£50
2 Sessions	£90
3 Sessions	£120

LED illumination therapy is a painless, non-invasive facial treatment that uses colour wavelengths of light to penetrate the skin at varying depths. This stimulates a healing response making skin regenerate faster and activates collagen producing cells.

These processes improve skin elasticity, increase blood circulation and slow down the production of enzymes which break down collagen. Together, these processes improve skin tone and clarity creating a fresher-looking complexion.

This treatment is great for those who suffer with sensitive skin conditions such as:

Acne | Congestion | Roscea | Eczema | Psoriasis
Anti-ageing | Fine lines and wrinkles | Dull and tired looking skin | Uneven skin tone
(Superficial Hyper pigmentation)
